

JOHANNES AARON FRAMON | DATA SCIENTIST

📍 North Jakarta, Indonesia ✉ aaronframon1@gmail.com ☎ +62 812 1086 0158 🔗 linkedin.com/in/johannes-aaron 📄 github.com/Algo-jo

PROFESSIONAL SUMMARY

Data Science and AI enthusiast at BINUS University with a strong academic background and practical experience in end-to-end data pipelines and Machine Learning. Proficient in data collecting, preprocessing, feature engineering, model training and evaluation using Python ecosystems.

EDUCATION

Bachelor of Computer Science – Streaming: Intelligent System

BINUS University · 2024 – 2028 · 3.76 / 4.00

EXPERIENCE

Software Engineering Project Contribution

BINUS University: S Class Program

January 2026 – Present, Jakarta, Indonesia

- Architected "Streakly", a full-stack productivity tracking application on a group of 3.
- Engineered high-performance UI components using React.js, TypeScript, and Vite, optimizing front-end delivery.

Academic Peer Mentor (Scholarship Recipient)

BINUS University: Student Learning Partner Program

September 2026 – Present, Jakarta, Indonesia

- Teaching for 5 undergraduate students facing academic difficulties in core Computer Science courses.
- Evaluating student learning gaps continuously through weekly study sessions.

Committee Leader

Santa Maria Della Strada: High School Yearbook Committee

August 2023 – May 2024, Jakarta, Indonesia

- Directed a 14-member multi-disciplinary committee to conceptualize, design, and produce the annual school yearbook on schedule and within budget constraints.
- Orchestrated a 2-day photo session for over 150+ students, establishing tight production schedules that eliminated operational bottlenecks.
- Managed end-to-end data collection, layout revisions, and stakeholder sign-offs, delivering a high-quality final print endorsed by 100% of school administration evaluators.

SKILLS

Core: Python, C++, Java, SQL

Tools & Libraries: Jupyter Notebook, Google Colab, Pandas, NumPy, Scikit-Learn, TensorFlow / Keras, Matplotlib, Seaborn

Methods: Data Collection, Data Cleaning, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation

Soft Skills: Leadership, Adaptability, Cross-functional Teamwork, Time Management

CERTIFICATIONS

Belajar Machine Learning untuk Pemula

Dicoding · 2026

Data Science Club Olympiads Participant

Data Science Club BINUS University · 2025

PROJECTS

Streakly: Productivity Tracker | React.js, TypeScript, Vite, Vercel

- Engineered a web application to track work logs and productivity heatmaps, implementing authentication and real-time database synchronization to boost daily user habit tracking.

CV Classifier | React.js, TypeScript, Vite, Node.js, Vercel

- Designed an automated candidate screening tool to classify candidate resumes based on skill matching algorithms and feature extraction, achieving high accuracy in domain classification.
